Experience

Volans Infomatics Pvt. Ltd, Software Engineer

Noida

Jul. 2023 to Ongoing
1 years 6 months

- Spearheaded the development of JWT APIs using Node.js, Laravel for React applications, ensuring secure authentication across web, Android, and iOS platforms.
- Developed and maintained Laravel applications, building scalable and efficient backend systems for various client projects.
- Supervised and mentored two junior developers, fostering growth through guidance on best practices and technical problem-solving.
- Managed deployment processes, ensuring smooth transitions from development to production environments.
- Implemented socket programming for real-time communication, significantly enhancing user engagement and experience.
- Contributed to the development of React admin panels, providing backend integrations and occasional front-end support.
- Efficiently managed tasks using Jira, ensuring the timely delivery of features and bug fixes.

API Venue, Software Engineer

Noida

Dec. 2021 to Jul. 2023
1 years 8 months

- Developed RESTful APIs for both static and dynamic QR code generation, enhancing secure transactions and payment solutions.
- Collaborated as a BaaS Partner and CMS Partner of ICICI Bank Ltd, delivering cutting-edge solutions in the banking and payment sector.
- Managed tasks efficiently using Jira, ensuring timely completion and delivery of project milestones.

Investors Clinic Infratech Pvt. Ltd., Software Engineer

Noida
Jan. 2020 to Dec. 2021
2 years

- Led the development of HR panels for employee onboarding, enabling efficient management and access to employee information through a web application.
- Developed Multi-Level Marketing (MLM) software that facilitated binary commission distribution based on the sales volume achieved by distributors.
- Created retention software to track and manage retention leads, enhancing customer engagement and retention strategies.
- Collaborated with cross-functional teams to deliver high-quality software solutions, ensuring alignment with project goals and timelines.
- Designed and developed websites using WordPress, ensuring user-friendly interfaces and responsive designs.
- Integrated Twilio for sending SMS messages, enabling seamless communication within applications.

Projects

HealthHub Admin

- Developed a multi-role admin system with Laravel, Node.js, MySQL, utilizing asynchronous APIs for seamless data exchange and tailored panel-specific user access.

Payment Transaction System

- Managed QR code payment systems to handle transaction amounts, commissions, and secure money transfers using public and private certificate encryption.

TicketTrack

- Created a ticket management system using Node.js, MySQL, and React.js, featuring user access assignment and a chat interface for seamless communication.

Product Portal

- Developed an oil-selling website using Laravel 9, allowing users to browse and purchase lubricants, coolants, and greases, with user authentication and product management features.

Property Pulse

- Built a dynamic Investor Clinic website using Laravel, enabling property listings, comparisons, wishlist management, lead generation forms, and blog integration.

Lead Management

- Developed a lead management system in Laravel to capture Facebook leads, store lead responses in a database, and facilitate data exports for efficient management and analysis.

MLM Management

- Developed an MLM project in Laravel for property sales, implementing a commission distribution system that allocates amounts to parent and child levels, along with a business idea component
